| <p>Discuss Use of Load Cell to update mass</p> <ul style="list-style-type: none"> <li>- Hung likes the proposal. Suggested using NFC to associate. Can also do a barcode methods.</li> <li>- Load cell method makes sense to make the process as streamlined as possible otherwise the process doesn't make too much sense</li> </ul> <p>Standup</p> <p>Luca: Worked on requests that nick had for mass replenishment, helped paras with the front end tasks, completed the db migration. Open to helping with deployment</p> <p>Paras: Worked on the web socket components and fronted stories for this sprint. Websocket is frustrating me a bit. Gonna work on hosting this weekend and get to the websocket stuff this weekend</p> <p>Ethan: Updating the shelf model right now. Nearly done. Gonna do the circuitry housing over the weekend.</p> <p>Thar: Working on fixing the frontend warnings. Some were easy. Others were a bit confusing. Should be done over the weekend.</p> <p>Sprint Planning:</p> |
