Decision Made / Agenda / Objectives / Plan for the Coming Week

2:35 – Report Feedback Updates

- Hung is very busy so we can share working version with Hung for feedback so he can provide it.

2:40 – First Sprint

- Lay groundwork for 3D model of the shelf. Set up basic backend and frontend for the first print. Essentially, get a dummy webpage down.
- Hung suggests that we think about making the sprint a useful component so focusing on one page may make more sense. This way it's more ideal for SCRUM. Doesn't have to be changed right now (for the report) but future sprints should be done this way.
- Luca suggests establishing a material visualization table as it encompasses all the dummy aspects.
- Avoid proper styling at the start. We can do that later

2:45 – Meetings going forward
- This can be the sprint reflection meeting in the future
- Hung says we're doing good

2:50 – Story Point Division
- Points range from 1-10
- Frontend – Thaurveen, Paras
  - o Visualize table (1)

- Backend – Paras, Luq
  - DB wrapper (3), table query class (3)
- Database - Luca, Tharveen
  - Set up structure SQL Lite (2) and create DB population script (4)
- Testing – Luca, Luq
  - Unit (1), feature (3), integration (1)
- 3D Modelling – 4 (Jean + Ethan)

Team Responsibilities for the Coming Week		
#	Name	Responsibility
1	Luca Filippelli	Finish report Start creating DB
2	Jean Granato	Finish report
3	Luqmaan Irshad	Finish report Start on backend methods
4	Tharuveen Raveendran	Finish report Start on frontend methods, look into creating a DB script
5	Paras Kumar	Finish report Start on front end + backend methods
6	Ethan Tran
